Emory Brown spectro-discovery records

6/4/76 Decker to Cochran:

Says he asked for these records under FOIA. He specified he was not using FOIA.

There is a 7/14/76 Kilty addendum. He says that Q1, Q2, Q4, Q5, Q9 and Q14 are "the only metal fragments examined by NAA." How about Q15? "Examined" elimintes the Gallagher line of his not liking the results. He got those results after examination and the records reflect that there weas this examination.
